Room Service: Help and Known Limitations

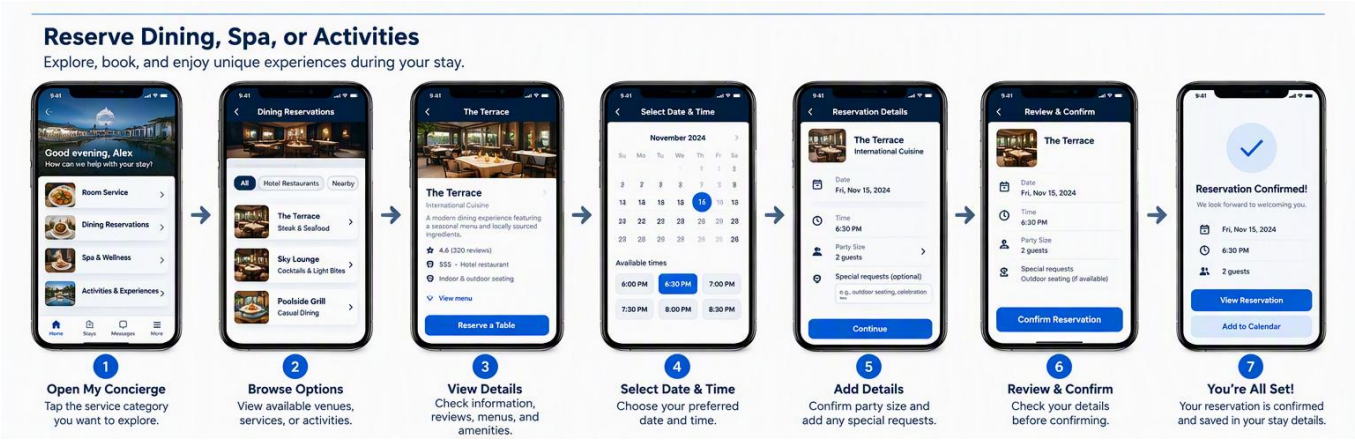

Situation	What to do
Room Service is not visible	Confirm the current stay is active and that the property offers digital room-service ordering.
An item is unavailable	Return to the menu and choose another available item. Menu content is maintained by the property.
Preparation time is not shown before checkout	Timing may be shown only after confirmation. Contact the property if an estimate is needed before ordering.
Checkout does not complete	Check connectivity and sign-in status. Before retrying, confirm whether an order or payment was already created.
A duplicate order or charge may exist	Do not submit again. Contact hotel support and provide the visible order or transaction reference.
Tracking has not updated	Check the last visible status and contact Room Service if the update appears delayed.
The session expired	Sign in again and reopen the experience. Confirm whether the previous transaction completed before starting over.

Payment safety

Never share a full card number in chat, email, or free-text support fields. My Concierge should display only masked payment details.

Feature 2: Reserve Dining, Spa, or Activities

Use Reservations and Activities to review available venues or services, choose a date and time, review important terms, and confirm a reservation. Supported categories depend on the participating property.

Confirmation matters

Reservations: Help and Known Limitations

Situation	What to do
A category is not visible	The property may not offer that category digitally. Check another available service or contact the hotel.
No times are available	Choose another date, time, venue, treatment, or activity. Availability may change.
The selected time disappears	Return to availability and select another time. Inventory is confirmed only when the reservation succeeds.
The reservation remains pending	Do not assume the booking is confirmed. Check reservation details or contact the responsible venue or service team.
A reservation needs to be changed or cancelled	Open the reservation details and follow the available options and property policy. Contact the hotel if no modification option appears.
A recommendation is no longer available	Recommendations support discovery but do not guarantee inventory. Open the experience to check current availability.
Dining is difficult to locate	Use Dining Reservations, not Room Service, to book a restaurant table.

Managing Orders and Reservations

Task	Guidance
View confirmation	Open the order or reservation details after a successful transaction.
Check status	Use Track Order for room service where available; for reservations, review the confirmed date, time, and location.

Avoid duplicate actions	If the app is slow or shows an error after submission, verify the transaction before trying again.

- Keep the app updated and use a stable connection.
- Review visible labels and confirmation information carefully.
- Ask hotel staff for assistance when a digital step cannot be completed.
