

My Concierge

Hilton's virtual concierge service

Product Owner: Rafaela Pinheiro

Background

Why are we here?

WHAT IF...

What if you could have a Hilton concierge on your phone, to help you book that massage you need, or make dinner reservations to celebrate your anniversary?

Your vacations couldn't be more pleasant than this.

Hilton's excellence at the palm of your hand.

Business Case

Initial Focus

Our Motivation:

As we advance the future of travel with our Hilton AI Planner, it becomes evident that our guests need more. This is the next step in our journey, aligning perfectly with our goals, using AI to enhance guest experience.

Guests want to spend more on ancillary services during their stay, but friction in the current process—such as unanswered calls, busy front-desk lines, and outdated paper menus—causes hotels to lose up to \$3.3 billion in potential transactional revenue annually.

Shall we unlock this digital revenue at Hilton? The proposal I brought you today will do just that!

Opportunity

What's the problem?

**DIGITAL
DEMAND**
67%+

of stays accounted for by members
logged into the digital ecosystem

ANALOG SERVICE

**Voice calls
and manual human service**

01

More than 67% of stays are already accounted for by members logged into the digital ecosystem (Hilton Honors), yet the channel for ordering room service and spa treatments continues to rely on voice calls and manual human service.

02

Based on Hilton – Investor Relations, we have an average of 330 million occupied nights annually (considering Hilton's current portfolio of 1.35 million rooms with an average occupancy of 67%), and we estimate that spending lost due to a lack of digital convenience is around \$15 per guest per night, representing a Total Addressable Market of \$4.95 billion across the global network.

330 MILLION OCCUPIED NIGHTS

\$15 PER GUEST PER NIGHT

\$4.95 BILLION TOTAL ADDRESSABLE MARKET

Proposal

What's our solution?

I propose the development of an integrated Virtual Concierge transactional module within the Hilton Honors mobile app.

This feature will act as a pocket-sized digital assistant, allowing guests to request and pay for hotel services and local experiences directly via their own devices, thereby eliminating friction and the need to call the front desk.

INTEGRATED • TRANSACTIONAL • MOBILE

Proposal

A connected guest experience, from request to revenue

One digital journey that simplifies hotel services, improves convenience and creates contextual upsell opportunities.

DIGITAL ROOM SERVICE

Interactive menus for meals, drinks and extra amenities, with charges posted automatically to the guest's room account.

ORDER • BILL • DELIVER

REAL-TIME SPA & ACTIVITIES

Direct scheduling integration so guests can check availability and instantly book massages, poolside cabanas or fitness classes.

VIEW • RESERVE • CONFIRM

LOCAL DISCOVERY & BOOKING

AI-powered recommendations for attractions, tours and restaurants, with ticket purchases or table reservations inside the app.

DISCOVER • PERSONALIZE • BOOK

CONTEXTUAL DYNAMIC UPSELLING

Automated offers triggered at key moments during the stay, including last-minute room upgrades and paid late check-out.

DETECT • RECOMMEND • CONVERT

Transform the app into a single service, discovery and revenue platform across the complete guest stay.

Return On Investment – 90 days Pilot

The Pilot Pays for Itself: Projected ROI of 153%

Projection based on 5 large hotels (~2,000 rooms) over 90 days.

Initial Investment
\$150.000

- MVP Development
- API Integrations
- In-Room Marketing

Return On Investment

Three Sources of Return (Earnings in 90 Days)

TOTAL PROJECTED VALUE

\$379,650

RETURN SOURCE		OPERATIONAL IMPACT	ADDED VALUE
01	F&B & Spa Margin	15% digital conversion on in-app orders <i>\$35 average order value</i>	\$198,450
02	Automated Room Upgrades	3% conversion from push notifications <i>Late check-outs and room upgrades</i>	\$151,200
03	Operational Efficiency	30K repetitive front-desk calls automated <i>1,500 hours saved</i>	\$30,000

Return On Investment

Final Financial Summary

Gross Financial Return

\$379,650

Net Gain (Pilot Profit)

+\$229,650

Project Pilot ROI

153%

For every \$1.00 invested in this pilot, Hilton captures \$2.53 in real business value within the first 90 days.

Measurement

Our KPIs – How we measure success:

01 USER ADOPTION & ENGAGEMENT	02 TRANSACTIONAL & REVENUE	03 OPERATIONAL EFFICIENCY

Competitors

Marriott Bonvoy

Service Overview

Mobile Food & Beverage (F&B)

Full Feature

(Available at selected resort and premium brands)

Spa & Activity Booking

Partial

(Redirects to web view or requires phone confirmation)

External Local Experiences

Limited

(Partnership-based, not native)

AI & Personalization Capabilities

Basic

(Rule-based chat routing, no predictive AI engine)

World of Hyatt

Service Overview

Mobile Food & Beverage (F&B)

Full Feature

(Excellent integration in premium/luxury brands)

Spa & Activity Booking

Partial

(Only available in top-tier wellness resorts)

External Local Experiences

No

AI & Personalization Capabilities

Emerging

(Experimenting with automated guest requests)

Our Advantages

THE VALUE STORY

1 Expose friction

2 Resolve natively

3 Convert value

Friction → Edge → Impact

01

Native Unified Ecosystem

vs. fractured web views

One-tap room service, spa, and tour purchasing.

FRICITION

External browser redirects create abandonment.

OUR EDGE

Native, single-token checkout inside the Hilton Honors app.

3x

HIGHER CONVERSION

02

Predictive AI Personalization

vs. static menus

Past preferences guide dining and spa recommendations.

FRICITION

Third-party tools only see the current stay.

OUR EDGE

Hilton Honors global CRM and Hilton AI Planner integration.

1:1

RELEVANT OFFERS

03

Local Marketplace Engine

vs. in-hotel limits

Marketplace transactions turn concierge into a revenue stream.

FRICITION

Revenue normally stops when the guest leaves the hotel.

OUR EDGE

Verified tours, museums, and transport through an open API.

10–15%

TAKE-RATE

Roadmap and Vision

Roadmap & Future Vision

40% of all on-property service requests
through the Hilton Honors app by Year 2

Make digital concierge ordering the standard guest preference.

WHY IT MATTERS

Build a friction-free, reliable mobile channel guests prefer over the room phone.

Increase on-property spend • Reduce front-desk operational strain

THREE STRATEGIC THEMES MOVING FORWARD

Core PMS Integration & Staff Workflow Scaling

Automate the backend fulfillment pipeline to ensure operational reliability.

➤ Direct-to-Department Ticket Routing

App requests bypass the front desk and route automatically to the responsible department's hardware.

IN PRACTICE

Room service orders print in the kitchen. Amenity requests, such as extra towels, go directly to housekeeping handheld devices.

➤ Live PMS Folio Billing Integration

The app checkout connects to the property PMS, validates active room status, and posts charges securely.

IN PRACTICE

Transactions flow to the guest's final room bill without manual staff entry.

REQUEST → ROUTE → FULFILL → BILL

Dynamic In-App Merchandising & Upselling

Maximize average order value through contextual, real-time prompts.

Contextual Push Notification Engine

Triggers automated offers using real-time external data and stay milestones.

CONTEXT IN ACTION

Rainy departure morning → late check-out offer
Temperature spike → chilled room-service beverages

Smart Menu Placement Algorithm

Reorders digital menus using the guest's current travel timeline.

CONTEXT IN ACTION

7:00 AM → breakfast first
Check-in hours → quick-grab snacks
Post-flight arrival → spa availability

Local Partner API Onboarding

Scale revenue beyond the hotel walls through secure third-party integrations.

A connected marketplace with automated economics

Unified Marketplace Checkout API

Brings transit, tours, museums, and partner bookings into the app checkout.

IN PRACTICE

Guests purchase attraction tickets with one secure token, without re-entering card details.

Automated Commission & Reconciliation Splitter

Calculates Hilton's 10%–15% affiliate commission on each third-party sale.

IN PRACTICE

Routes the partner share while retaining Hilton's fee in real time, reducing manual accounting overhead.

ONE CHECKOUT • AUTOMATED SPLIT • NEW REVENUE

The Next Frontier

Beyond the stay

A connected ecosystem for personalized hospitality, automation and local urban life.

01

THE AUTONOMOUS STAY

VISION

Sync hotel operations with the guest's real-time schedule and smartphone sensors.

IMPACT Adjust spa bookings around flight delays and prepare coffee as the guest wakes.

02

ROBOTIC FULFILLMENT INTEGRATION

VISION

Connect the digital concierge app directly to autonomous in-hotel delivery robots.

IMPACT Route simple amenity requests to robotic carts and eliminate repetitive delivery-task costs.

03

THE HILTON TOWN SQUARE

VISION

Open the on-property digital marketplace to local residents, not only hotel guests.

IMPACT Monetize underused spaces through local bookings for co-working, pools and spas.

CLOSING TAKEAWAY

"Erase the boundaries of the hotel property, making the Hilton Honors app the primary portal for personalized hospitality, automation and local urban life."
